

AUTO GLYM™

Bodywork Shampoo Conditioner

- Regular careful washing, especially in bad weather, goes a long way to preserving the finish of car paintwork. Many household detergents may have a detrimental effect when used on cars, removing polish from paintwork and leaving the surface unprotected.
- Removes traffic film and greatly assists in preserving finish and appearance.
- Special additional ingredients which form a glossy water-repellent barrier.
- Protects and extends the effect of Autoglym Super Resin Polish and Autoglym High Definition Wax.

“ Little work was needed to get that level of shine. It repelled dirt for longer than most too.

”

Available in:
500ml, 1L

Application Method:

- If possible hose bodywork first to rinse away excess road film.
- Sponge one side of car with shampoo working downwards from roof, rinse and complete other half.
- Rinse entire vehicle well and dry surface.
- Finally, a light wipe with a good quality chamois is all that is needed for a superb finish.

raw materials

Use Bodywork Shampoo Conditioner with tepid water. Only 2 caps full of product are required per 10 litres of water.

Sponge the car, one side at a time starting from the roof and working downwards.

Use plenty of water in a sweeping action to flow the dirt off.
